Captain Security: M365 Security
Compliance Guard: M365 Governance, Risk & Compliance
Backup Master: M365 Backup & Recovery
Agent Awareness: Security Awareness Service
Dr. T: Multi-Tenant Management

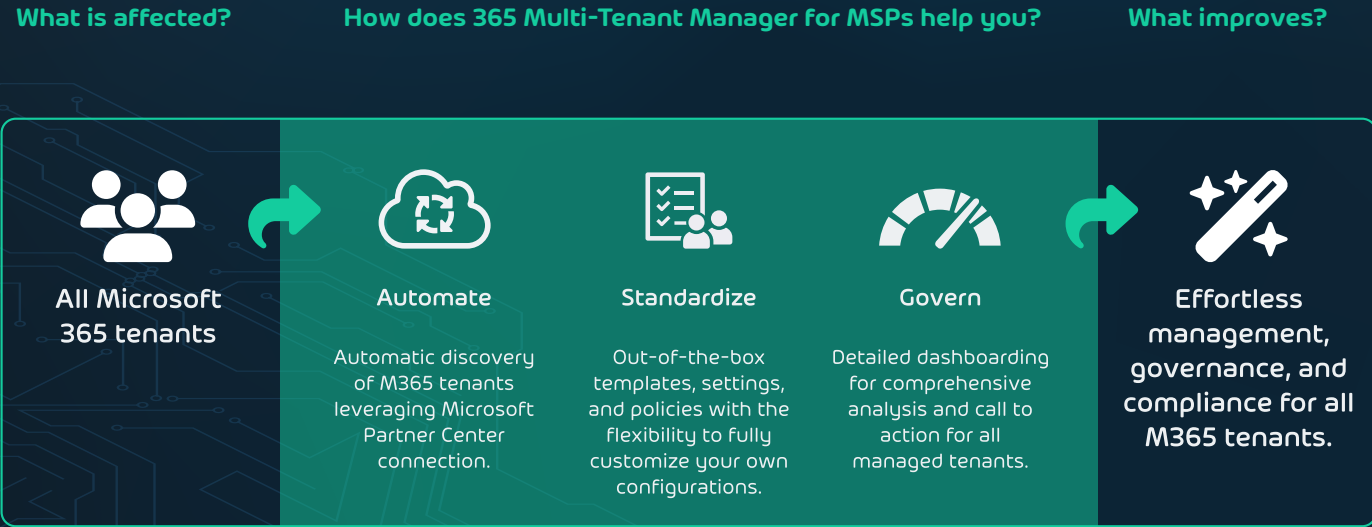

MULTI-TENANT MANAGER FOR MSPs

AUTOMATE **STANDARDIZE** **GOVERN**

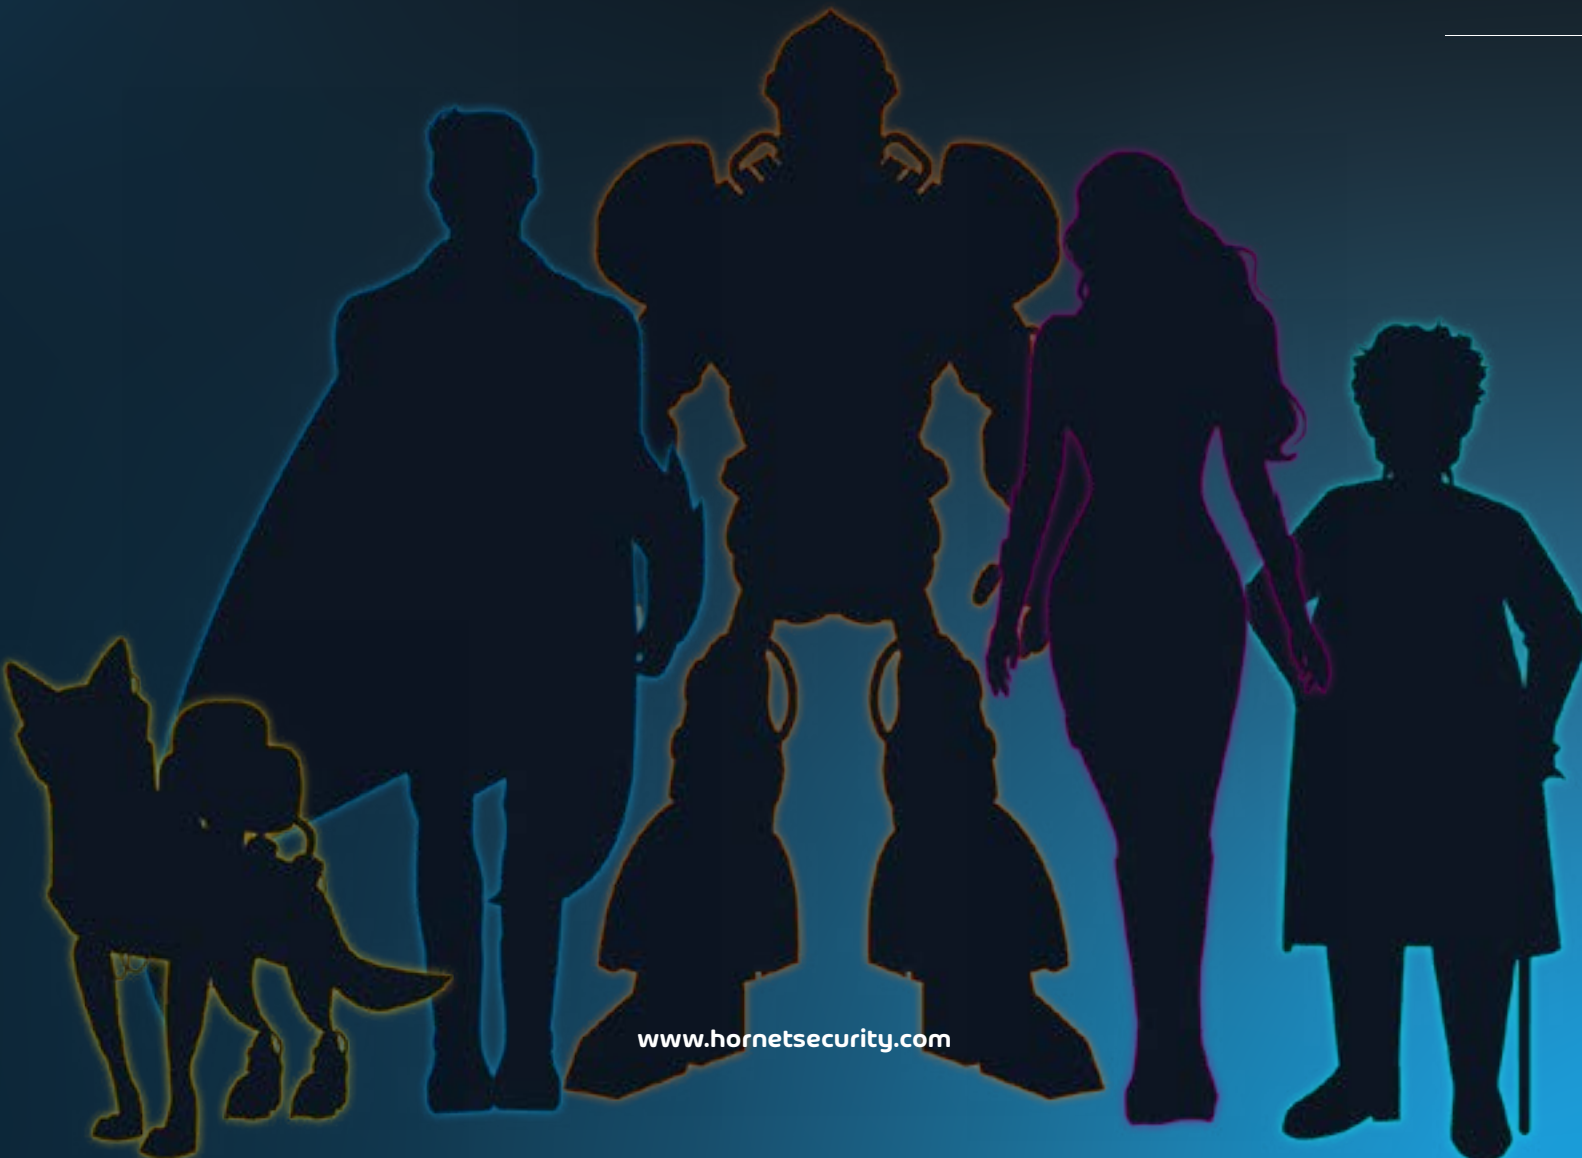

Managing M365 tenants is a resource-hogging task, with service providers spending several hours trying to juggle multiple admin portals to configure their customers. Configuring M365 tenants is a highly detailed and complex task, and simply knowing how to configure them isn't enough – service providers must also maintain tight security and keep risks at bay. Multiply all this across diverse tenant needs for different customers, and the problem very quickly grows into a mountain that can be overwhelming.

MANAGING MICROSOFT 365 TENANTS MADE AS EASY AS IT GETS

PLAN 1

365 TOTAL PROTECTION BUSINESS

Establish your email security foundation with a multi-level filtering system, advanced encryption, and signature & disclaimer solutions to keep your email communication clean and legally compliant.

- AI-supported spam & malware protection: Machine learning and AI technologies guarantee a detection rate of 99.9% for spam and 99.99% for viruses.

Simple certificate management with Email Encryption: Apply for, renew or obtain new certificates for users on a permanent basis.

Signature & Disclaimer: Centralised control over company-wide email signatures.

PLAN 2

365 TOTAL PROTECTION ENTERPRISE

Stay ahead of cybercriminals with our premium next-gen protection with self-learning, AI-based filters and detection mechanisms, and benefit from additional features that ensure compliance and the maintenance and uptime of email communication.

- Advanced Threat Protection with AI-based Targeted Forensics: Recognises and blocks the latest and most complex attack methods and provides a comprehensive overview of all attack attempts, security alerts, and forensic information.

Legally compliant, domain-wide email archiving.

Continuous and secure email communication with Continuity Service: Guaranteed availability of the back-up server of 99.9%

PLAN 3

365 TOTAL PROTECTION ENTERPRISE BACKUP

Powerful backup and recovery features for Microsoft 365 data: From mailboxes, Planner, OneNote, and Teams to OneDrive & SharePoint. Your data is securely stored in our regional data centres in accordance with the respective data protection requirements.

- All in one all-inclusive fee: Unlimited storage space, centralised management, easy search and recovery.

Automated backups: All files are automatically backed up several times a day.

Control over data jurisdiction: You decide in which region your data is stored.

PLAN 4

365 TOTAL PROTECTION COMPLIANCE & AWARENESS

Secure your business operations with the most comprehensive Microsoft 365 solution on the market, covering security, backup, governance, risk, and compliance - in one package, in one licence.

- SECURITY AWARENESS SERVICE

Spear phishing and awareness engines: Realistic, customised spear phishing simulations with different levels of difficulty.

Customised, fully automated eLearning: Each user is trained individually according to their needs.

Employee Security Index Reporting: Keep track of the training progress of your employees.

PERMISSION MANAGER

Get a clear overview of data sharing in your organisation.

Simply remove potentially dangerous or unwanted access rights.

Assign out-of-the-box best practices for custom sharing policies to gain control over access rights.

- DMARC MANAGER

Ensure compliance: Effortless setup and maintenance of DMARC, DKIM and SPF best practice Guidelines.

Easy DNS management: Seamlessly add and change DNS records in seconds.

Prevent identity theft: Get a comprehensive overview of the sources that send emails via your domains.

- AI RECIPIENT VALIDATION

Pattern analysis: An AI-based self-learning engine analyses email communication to prevent human errors.

Recipient validation: Emails are checked for potentially unintended recipients and the sender is given the opportunity to correct the recipient group.

Data protection: Avoid accidentally sending sensitive and personal data.
