- NO POST TRIAL HOUNDING
- IF YOU'RE NOT IMPRESSED YOU SIMPLY WALK AWAY

WHAT IS AMBER VAULT HOSTED?

Amber Vault hosted allows you to host your business-critical operations in the cloud. Experience the benefits of our highly resilient, secure, and scalable private cloud environment inclusive of unlimited technical support for a fixed monthly cost.

With cloud adoption quickly growing year on year why not take advantage of the benefits it offers vs maintaining or replacing ageing on-premise servers and infrastructure. Using a cloud infrastructure can increase agility allowing you to scale up and down as your business requires and without having to purchase and configure hardware.

Whether you want to move your entire infrastructure to the cloud or just host a key application, our cloud experts will work with you to establish a customised solution to meet your requirements.

WHY CHOOSE US?

- Quality – Not all clouds are created equal! Our platform is built exclusively on enterprise level HPE hardware so you can be sure your data is in safe hands.
- Experience – We have been in business for nearly 40 years and have a team of cloud solution experts ready to guide you.
- Security – An aspect commonly overlooked when dealing with cloud providers, our platform spans 2 Tier 3 UK based datacentres with all data encrypted to military grade standards.
- Support – Support is where we shine. Our fully managed services come backed by our team of 16 highly skilled engineers.
