Our Services

Envisioning Service

Transform Your Business with the Power of Microsoft

This service enables you to discover the best solutions for your challenges, create a roadmap for success, and see the possibilities in action. Our Envisioning Service is a customised service where we work with you to understand your vision, goals, and pain points. We then design and demonstrate the best solutions for your business challenges using the latest Microsoft technologies. You can see the solutions in action with live demos and get expert advice and feedback from our experienced consultants. We also help you create and implement a realistic and actionable roadmap and provide ongoing support and guidance. We help you accelerate your adoption and return on investment, and gain clarity and confidence on your digital transformation journey.

Apps and Automation Service

How We Can Help You Harness the Power of the Power Platform

The Power Platform is a suite of tools and services that enables you to create customised apps, automate your workflows, analyse data, and build chatbots. It consists of four components: Power Apps, Power Automate, Power BI, and Power Virtual Agents. Our Apps and Automation service is designed to help you leverage the power of the Power Platform to transform your business processes and applications. We have a team of experienced and certified Power Platform consultants who can help you with various aspects of your project, from assessment and design to deployment and support.

With our Apps and Automation service, you can benefit from a range of advantages, such as reduced costs and increased efficiency, improved collaboration and communication, enhanced data quality and security, better decision making and insights, and increased customer satisfaction and loyalty. Whether you want to digitise your paper-based or manual processes, optimise your existing workflows, create apps that address your specific needs or problems, or enhance your efficiency and customer service, we can help you achieve your goals.

Intranet Accelerator

A Service to Connect and Inform Your Employees

Would you like to have a private website that allows you to communicate and collaborate with your entire organisation, including your frontline workers? Do you want to share news, documents, policies, and other information with your staff in an easy and engaging way? Do you want to have a secure and reliable intranet that reflects your brand, culture, and needs? If you answered yes to any of these questions, then you need our Intranet Accelerator service.

Our Intranet Accelerator service helps you create an intranet solution that is tailored to your organisation. We use the best practices and tools of Microsoft 365, such as SharePoint, Teams, and Yammer, to build an intranet that is user-friendly, interactive, and secure. We can help you design, configure, and launch your intranet in a matter of weeks, not months. We can also provide training, support, and maintenance to ensure your intranet is always up to date and running smoothly. With our Intranet Accelerator service, you can have an intranet that connects and informs your organisation like never before.
