

CK Enhanced Importer

Product Overview:

An enhanced flexible import utility for both Opera 3 & Opera 3 SQL SE, which allows the user to import easily from Excel or CSV files whilst giving the user full control over the mapping of all fields.

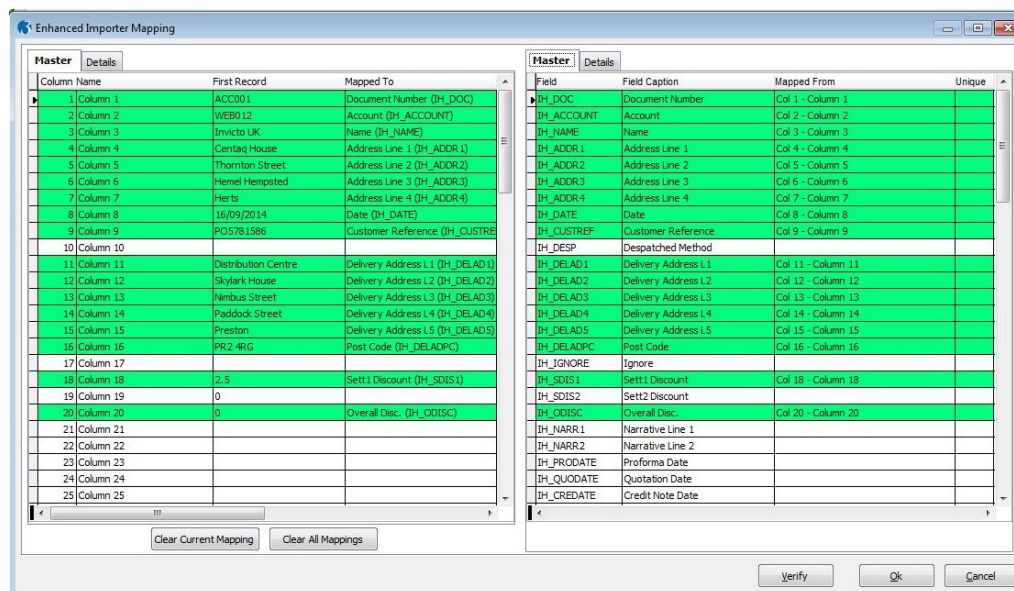

The standard Opera import routines are not used at all by CK Enhanced Importer and therefore is highly optimised for speed, especially when importing large numbers of records.

Featuring drag and drop field mapping makes CK Enhanced Importer simple to use allowing quick and easy matching of the import file fields to the relevant fields within Opera. This gives far more flexibility than the standard rigid fixed file formats of the standard Opera import routine.

When combined with CK Herald, CK Enhanced Importer caters for scheduled imports at user-defined intervals such as every hour, day or week for example.

Key Functionality:

- ✓ Flexible import utility with simple drag and drop field matching
- ✓ In-built validation checks
- ✓ Import file column headings are displayed for clarity and ease of use
- ✓ Batch support allowing multiple files to be imported at once
- ✓ Supported import types include standard/SOP/TOPS with more to follow
- ✓ Option to clear/refresh destination table in Opera and update existing records only
- ✓ Integration with CK Herald for automatic imports at pre-set intervals

End User Software Price:

Software Cost: **£ 665 +VAT**
AMC: **£ 280 +VAT**
Telephone Support **£ 155 +VAT**

Note: The Pegasus Opera Toolkit module must be present on the system
