What We Offer to Microsoft Customers

REAL-TIME INTEGRATION

Full seamless integration of your Microsoft ERP system with the Experlogix Digital Commerce platform for Microsoft.

ECOMMERCE SOLUTION

Award winning eCommerce technology with multiple options to suit your business needs, including B2B webshops, B2C retail eCommerce, microsite, order punch out and more.

MOBILE APP SUITE

Dedicated mobile ordering apps for both your customers and your sales team including a SalesRep app for field sales and van sales, branded customer apps, in-store sales apps, along with custom app development.

FULL DIGITAL CATALOGUE

Management of even the largest catalogues from one platform allowing ease of use across multiple digital ordering products and marketplaces such as Amazon, eBay, Facebook and Instagram.

SECURE CLOUD PLATFORM

A fully supported secure platform allowing customers deployment, a product roadmap with new features monthly, all with continuous in-house support and training from our customer success team.

API & INTEGRATION

Integration of the platform with multiple API's including payment gateways like Worldpay, Stripe and Realex plus other tools like Mailchimp, HotJar, Campaign Monitor and more.

Benefits

IMPROVE CUSTOMER SERVICE

24/7 online ordering and account access for customers and your sales team across multiple devices

REACH NEW MARKETS

Accept orders across different digital ordering products and marketplaces in multiple languages, time zones and currencies

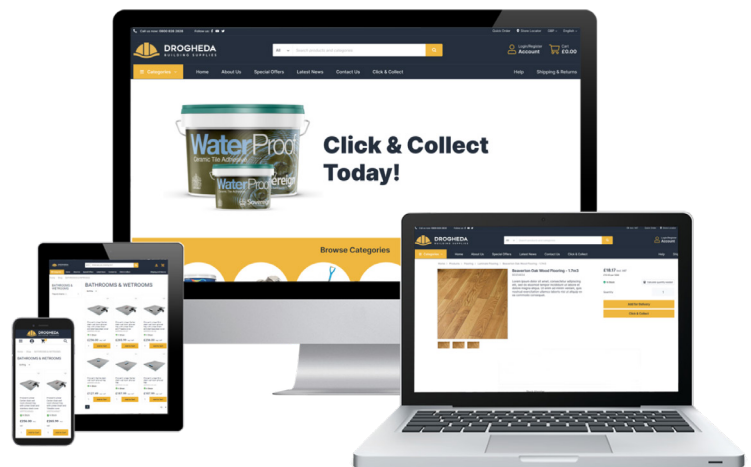

REDUCE COMPLEXITY

With our SaaS (Software As A Service) model we manage, grade and support your software centrally

INCREASE BUSINESS EFFICIENCY

Save time and money while eliminating errors by reducing manual order processing

Testimonials

“Integration with our ERP system is a massive benefit to us. All customer's price lists are available to them immediately. We now spend less time phoning the office to check pricing and stock levels, which means more time for internal sales to actually sell, follow up quotes and chase leads.”

*- Ian McLoughlin |
Demesne Electrical*

“We've gone from wheeling around vast amounts of catalogues in large briefcases, to walking into a customer with our entire catalogue on an iPad. That along with live ordering straight into our back end systems. It's 100% better!”

*- John Cunningham |
Creative Stamping*

IRISH CREATIVE STAMPING LTD.

“The Experlogix Digital Commerce Platform is excellent, really handles the subtle differences between B2C and B2B very well without having to embark on lots of additional bespoke development.

The real strength is in the ability to use the same data/information but apply this to multiple sales channels, be they web, mobile apps or many more.”

*- James Thornton |
Ochiba Business Solutions*

“We have signed up new trade customers, have gained entry to new markets. We can now reach customers where our field reps previously could not. ECommerce sales now represent almost 30% of our global sales revenues and 60% of all new business is online.”

*- Simon Grennan |
Quality Tractor Parts*
