DATA CAPTURE

BRIDGE WMS

The Complete Warehouse Solution

Traceability Module

The Bridge WMS Traceability Module is designed to enhance warehouse management by providing comprehensive tracking and traceability of products throughout the supply chain. This module ensures accurate and efficient processes, leveraging modern barcode technology for real-time updates and seamless integration. By implementing the Bridge WMS Traceability Module, businesses can achieve greater accuracy, efficiency, and transparency in their warehouse operations, ultimately leading to improved customer satisfaction and reduced operational costs.

Barcode Scanning

Utilise advanced barcode scanning to streamline data entry and reduce errors. This technology ensures that every product movement is accurately recorded and easily traceable.

Key Features:

- Streamlined data entry.
- Accurate recording of product movements.
- Easy traceability of products.
- Real-time updates using modern barcode technology.

Serial/Batch & Lot Tracking

Manage and trace serials, batches and lots, ensuring compliance with industry standards and regulations. This feature is crucial for maintaining product quality and safety.

Key Features:

- End-to-End Visibility.
- Compliance Management.
- Quality Assurance.
- Inventory Control.
- Seamless integration with existing systems.
- Operational Efficiency.

Automated Data Capture

Reduce manual entry errors with automated data capture. Automatically extracting details from barcodes i.e. GS1, improving efficiency and accuracy. This feature streamlines operations by minimising human error and speeding up data processing.

Key Features:

- Reduction of manual entry errors.
- Improved efficiency and accuracy.
- Streamlined operations.
- Minimisation of human error.
- Speeding up of data processing.
- Improved customer satisfaction.
