

## Amber Vault Back Up

An organisation's digital data is absolutely paramount to its operation!

It is reported that 80% of businesses affected by a major data loss incident either never re-open or close within 18 months.

Every company wants the peace of mind that their data is secured and easily accessible no matter what.

**AMBER VAULT BACKUP**

### Amber Vault is DCS's new cost effective cloud backup offering

Your data will be held both on site and in our secure tier 3 datacentre in Yorkshire. A Tier 3 datacentre guarantees 99.982% availability of the data. There will no longer be a need to swap and maintain a rotation of tapes or portable hard drives. Your backup data will be encrypted both on site and in our datacentre as well as in transit with your own encryption key.

With **Amber Vault's** excellent compression techniques, superior performance and block level incremental backups you will have the ability to retain days, weeks, months and even years of point in time backups. The most recent edition of **Amber Vault** now includes the ability to back up physical workstations and servers.

It is compatible with both Hyper-V and VMWare hypervisors and agents are available for Active Directory, SQL Server and Exchange Server.

With monthly subscription plans starting from £99, including the backup of up to 4 Virtual Machines and up to 0.5TB (500Mb) data, peace of mind can be yours for a low outlay.

### The benefits

- Significantly reduced backup times
- Quick restore procedure
- Backups stored both onsite and offsite
- Efficient and flexible use of your bandwidth
- A complete disaster recovery solution
- The ability to keep a longer history of backups
- Fast Implementation
- The ability to restore entire Virtual Machines (VMs); Physical Servers; individual files; laptops and PCs; Active Directory objects, SQL objects and mailboxes
- No rotation of backup media required
- Off-site backups are encrypted and stored in a UK tier 3 datacentre
