The world of digital signage is affecting everyone, and for good reason. Don't run the risk of being left behind - find out how effective digital signage can transform your communications (whether in a Retail, QSR, Education or Corporate Communications environment).

WHY NOW?

60% OF COMPANIES WILL INSTALL DIGITAL SIGNAGE BY 2020

\*Samsung UK Retail Digital Signage Survey 2015

\*Samsung UK Retail Digital Signage Survey 2015

63% of people report that digital signage catches their attention.\*

50% of companies are using digital signage to enhance internal communications.\*

Up to 25% reported increase in productivity from engaged employees.\*

Did you know?

Cloud based, for Signagelive does not mean that you have to have a permanent internet connection for your devices to work. We've harnessed the power of the cloud so that you can still have your screens showing content even if your internet goes down.

Signagelive has lots of different layout backgrounds you can use for FREE to get content up and running as quickly as possible on your new shiny displays. They cover all sorts of industry verticals. If you're a content whiz you can of course create your own too!

to suit your project

Did you know?

Signagelive supports a wide range of different hardware? We have always remained hardware agnostic, because the choice of what to buy should be down to you (the customer). So go and mix and match to your heart's content and ensure you buy the right product for the solution(s).

## USE SIGNAGELIVE TO:

Schedule

Organise content in a playlist simply or use advanced tools to programmatically schedule through metadata.

Manage

1 to 1000+ screens by yourself or add as many network users as needed with appropriate access restrictions.

Report

Are the screens on? Are they playing content? How many times? What are the trends? All this and updating firmware too.

Interact

Emergency messaging, but so much more: turn your digital signage network into a broadcast-worthy experience.

SUPPORTED ON ALL DEVICES:

## WHERE CAN YOU USE SIGNAGELIVE?

Did you know?

Security is a major focus for Signagelive? We believe you should have the benefits of cloud technology without having to bear the risk of security breaches. Our platform is thoroughly penetration tested on a regular basis to keep up with any technology advancements in this field.
