

ANALYTICS

Record
Measure
Control

Customisable Interface

Easily tailor your system to show your own critical performance indicators

Graphical Analysis

Display data analytics in a variety of graphical charts to your liking

Enterprise wide Intelligence

Analyse data from any part of your business for informed decision-making

Key Features

- ▶ Built using our 'iQ Data Drill Technology' for report data mining
- ▶ Interactive analysis from summary level to transaction
- ▶ Drag & drop customisable dashboards
- ▶ Configurable by role and user without coding or programming experience
- ▶ Support for multiple chart types, gauges & detailed result views for rich presentation
- ▶ Selective current, comparative & variance analysis
- ▶ Analyse any iQ business objects including custom user defined types

Highlights

- ▶ **Easy Design**
Start with blank canvas, define own analysis criteria, define results screen and graphs
- ▶ **Total Analysis Breakdown**
Start with holistic view and easily drill down to constituent parts. Combine several criteria to interrogate data
- ▶ **Filtering Results Screen**
Results information can be further refined by sorting, grouping and filtering
- ▶ **Comparative Analysis**
Compare data from a previous day, week, month, period or year to identify trends and gaps
- ▶ **Graphical Analysis**
All information simultaneously displayed in a wide choice of graphs
- ▶ **Security**
Access to BI Models can be controlled by role and user

Intact iQ Analytics is a powerful suite of applications developed specifically for real-time business analysis and reporting in enterprises of any scale or sector and at every level of your organisation. It has been developed to complement and work seamlessly with all other Intact iQ modules.

While customisation is the key to good business intelligence, the range of analysis and reports that can be generated is limited only by the data in the system and the imagination of the users. Intact iQ Analytics can replace traditional line-by-line reports or spreadsheets for more effective and meaningful monthly or ad hoc management reporting.

- ▶ Enhanced decision making with instant access to accurate, real-time & relevant information
- ▶ Identify wasted resources & reduce costs
- ▶ Centralised information is accessible to all via a dashboard or report
- ▶ Get accurate historical data, real-time updates, synergy between departments, forecasting & trending
- ▶ Reduce the time spent on monthly and management reporting to concentrate on information analysis
- ▶ Identify, track & monitor customer purchasing habits to effectively segment your current and future customer base
- ▶ Exceed customer satisfaction expectations
- ▶ See where your business has been, where it is now & where it is going
- ▶ Data access can be restricted by segmenting users according to predefined groups
- ▶ BI Models can be easily defined, removing the need for expensive external consultancy
