You can rate each customer by importance to ensure that stock is allocated to your most valuable customers first.
- ▶ **Price and Availability Queries**
Quickly deal with speculative 'price & availability' queries for customers, with applicable discounts
- ▶ **Support for Flexible Pricing & Discounts**
In conjunction with the Price Book, complex pricing schemes can be easily adopted and managed

Intact iQ Distribution is a powerful set of business administration and account applications that has been developed over two decades specifically for the wholesale and distribution sector.

The overall objective of this module is to simplify and automate tasks and processes as much as possible and to optimise staff productivity. That includes alerts and reports or KPI data in multiple choices of format – SMS, email, graphs or if required, traditional long form reports and spreadsheets – and customising them to individual preferences.

- ▶ Avoid overstocking/stock-outs with our stock replenishment review facility
- ▶ End user screens & menus can be quickly and easily customised to suit individual preferences
- ▶ Set individual or role-based alerts to identify certain conditions
- ▶ Tight implementation of your credit control policies will minimise bad debts
- ▶ Speed up data order entry with screens configured to be easy to use & requiring the minimum amount of key strokes
- ▶ Reduce admin time with carefully planned access/security policies
- ▶ Create effective & easy to manage workflow scenarios to implement controls and authorisations
- ▶ Exceed customer expectations with exceptional order fulfilment rates
- ▶ Increase transparency with full historical traceability throughout
- ▶ Make better, faster decisions with scheduled reports delivered to your dashboard, email or printer
