Intact iQ Financials is a powerful set of financial and accounting applications that is common to all our business management solutions. It is packed with features that support tight control of your business finances including margins/profitability, credit control, reporting budgeting, tax and auditing

Customisation is the key characteristic of this and all iQ modules, with tailored reports and alerts, workflow automation, role-based security & integrated analytics. It also enables easy setting of specific business rules and information presentation in user-friendly formats such as dashboards and smartphone alerts.

- ▶ Protect confidential financial information with role-based security policies attached to each user
- ▶ Configure employee screens to speed up data entry and only allow them to see information specific to their role
- ▶ Standardise processes and data to ensure consistency in end user experience and results
- ▶ Save time querying transactions with immediate drill down on all reports
- ▶ Manage by exception using up-to-date, relevant information. Get scheduled reports and KPIs delivered to your desktop
- ▶ Manipulate pivot tables to view real-time information the way you want to see it
- ▶ Design your own reports
- ▶ Open multiple screens and toggle from one to the other
- ▶ Increase transparency with full auditing of transactions and accounting information
- ▶ Automated authorisation process
