

Manage by
Module

Intact iQ is all about you and your business. With trusted, solid and robust financial management at its core our dedicated team can assist you in picking the industry modules that best suit you. Each module is designed to help your users better serve your customers.

Intact iQ Financials

Common to all of our business management solutions, Intact iQ Financials is a powerful set of financial and accounting applications. It is packed with features that support tight control of your business finances including margins/profitability, credit control, reporting budgeting, tax and auditing.

Customisation is the key characteristic of this and all iQ modules. We work closely with you to ensure you take full advantage of tailored reports and alerts, workflow automation, role-based security and integrated analytics. These capabilities and more ensure information is presented in user-friendly formats on-screen, in dashboards or via smartphone alerts.

Intact iQ Distribution

Intact Software has a pedigree in developing business solutions for wholesale and distribution enterprises since it was set up in 1992. Our generic retailing and supply chain functionality is complemented by specialist vertical modules to serve multiple sectors. These include construction supplies, hardware, electrical, medical devices, food products, multi-branch, EPOS, web retailing and trade ecommerce, supply chain, account management, credit card integration, central and branch inventory management with bar code scanning, quotations, trade counter, cash drawer etc

Intact iQ Analytics

Business Intelligence is now an essential tool for any enterprise. The powerful and adaptable iQ suite offers intelligent analytics for enhanced decision making at every level of your organisation. With instant access to accurate and real time information, it simplifies and automates regular analysis and reports for optimum staff productivity. It includes alerts and reports or KPI data in multiple format choices, all tailored to individual user preferences.

Intact iQ Relationship Management

Relationship Management today has progressed far beyond simple customer contacts and records. iQ RM covers customers, prospects, suppliers, partners, and third parties such as state and regulatory agencies, marketing resources, advisory, trade and professional bodies, etc. Its smart features capture key information and make it available on screen to all staff for incoming and outbound contacts. All functions are easily tailored to suit you and your needs. Various options are available to suit your requirements.

Intact iQ Webshop

The Intact iQ Webshop is an out-of-the-box solution for B2B and B2C e-commerce which seamlessly integrates with Intact. From critical account data and trade specific prices, to live inventory updates and automatic return of orders to Intact, the Webshop is a powerful and affordable solution with trade and retail features. The Intact iQ Webshop will allow you to expand your market reach, enlarge your customer base and increase your revenue potential.

Intact iQ Integration Services

In Intact iQ, integrating with electronic data, ecommerce and mobile solutions, signature capture or indeed any 3rd party application is simplified and expertly managed. Using a combination of Intact iQ's web and integration services you can be assured of a seamless transmission of data. Your Intact iQ system becomes the hub of all your business information, connecting the thousands of moving parts within your organisation.

Intact iQ Trade Counter

Intact iQ offers Trade Counter functionality above and beyond anything else available in the market. It is the solution of choice for businesses that have a mixture of trade, retail and wholesale.

Recognising the important role that cost, margins, stock and customer service play in any supply chain, the Intact Trade Counter module fully integrates everything you need; from quotations and order placement to deliveries and collections.

It can handle multiple sales channels, complex stock control, order processing, customer relationship management, financials and more. This ensures a smooth flow of information and access to real-time data across your business.

Intact iQ Mobile Warehouse

Intact's mobile warehouse solution is designed to automate the processes of today's busy warehouses and distribution centres. It embraces advances in modern hand held technology to enable you to automate previously labour intensive warehouse tasks such as stock checks, goods received, order picking and barcode checking.

Mobile stock control within your warehouse can dramatically increase your time efficiency and data accuracy and ultimately improve your bottom line.

Intact iQ Sales Rep App

Business environments today have changed dramatically. With an explosion of mobile devices, working remotely is now commonplace, enabling increased productivity, faster decision making and a superior level of customer service. As an extension of your Intact iQ, our sales rep app gives you two way communication of price, orders, inventory and customer information. You can also view real-time customer details and history, place orders, view quotes and generally improve customer relations.

Intact iQ Job & Project Costing

Intact iQ's fully integrated Job & Project Costing Module is ideal for engineering companies, contractors, builders, professional services, consultants & architects. For any order-specific or project-based business, managing revenue and cost is imperative. From simple job tracking to sophisticated budgeting requirements, the Intact Job & Project Costing module provides an effective way to maximise your resources and tightly control each job.

Intact iQ Telesales

The Intact Telesales module is a proactive sales tool to help you grow your business. It enables you to take full advantage of the knowledge you have built up over time on customer buying preferences. The module allows you to schedule regular calls to your customers based on customisable criteria and capture sales orders. Combined with the available reports and business intelligence in the system, you can easily monitor your staff performances or the effectiveness of your approach. Through clever use of highlighting and the condition editor, telesales staff can be prompted to upsell and identify 'gaps' while on the call.

Intact iQ Asset Register

Intact iQ Asset Register allows companies, large and small, to maintain a register of all assets in their company. With several different depreciation mechanisms built-in, the asset register becomes an integral part of your business. Your depreciation is automatically calculated and accounted for in the general ledger. Intact iQ also offers a more powerful solution where tracking asset costs in fleets is a requirement – we understand that this is a complex requirement and have built a solution to meet it.
